About ISIC

The International Society for Intelligent Construction (ISIC) is a global knowledge hub for intelligent construction technologies (ICTs), supporting agencies, contractors, consultants, academia, and related industries.

ISIC promotes the use of ICTs across the entire infrastructure life cycle—from survey and design to construction, operation, and maintenance—by integrating scientific knowledge with advanced practices. Its mission is to improve quality, reduce costs, and enhance safety while adapting to changing environments and minimizing risks.

The scope includes all current and emerging ICTs, covering intelligent sensing, data analysis, decision-making, and execution.

PDH Credits Available

Topics

- Technology Innovations (3D designs, machine controls, etc.)
- Robotic/Automation
- Material Delivery Management System (MDMS - expanded e-Ticketing, Digital As-Built)
- Quality Control & Monitoring
- Data Management & Security
- Digital Twins & BIM
- Life-Cycle Assessment & Risk Management
- Artificial Intelligence/Deep-Learning
- Education & Training
- Practical Implementation

Who Should Attend

- Federal, State & Local Agencies
- Construction Specification Writers
